

Educational Attainment in the OECD, 1960-2010*

Angel de la Fuente^a and Rafael Doménech^b

September 2012 (Version 3.0)

Abstract

This paper describes the construction of series of educational attainment of the adult population in a sample of 21 OECD countries covering the period 1960-2010. These series are a revised version of the data set described in de la Fuente and Doménech (2002).

Keywords: educational attainment, schooling.

JEL: I20.

*: This paper is part of a research project cofinanced by BBVA Research and Fundación Rafael del Pino. We gratefully acknowledge additional support from the Spanish Ministry of Science and Technology through CICYT grants ECO2011-28348 and ECO2011-29050. We are grateful for the help and information provided by the Statistics and Indicators division of the OECD and by the National Statistical Institutes of several of its member countries. In particular, we would like to thank Aila Repo (Finland), Walter Hörner (Germany), Anna Borkowsky (Switzerland), Peter Scrimgeour and Wilma Schofield (UK) and Takao Ito (Japan) for their help with the data and Juan Ramón García and Kat Deligiannidou for their competent research assistance.
