# Weekly Focus: Politics and Retail Sales

Kim Chase / Amanda Augustine

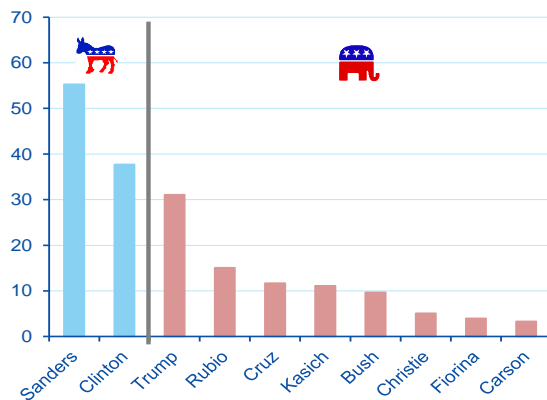

## Trump and Sanders Projected to Win New Hampshire's Presidential Primary

After a Democratic stalemate and a Republican upset in the Iowa caucus, all eyes are on **New Hampshire's primary (Tuesday)**. The polls show Trump with a 16 point lead (Real Clear Politics poll average), with Rubio surging from behind to overtake Cruz for the runner-up spot. Although Trump remains the favorite to win New Hampshire, history shows that all this could change if he falls victim to a Howard Dean-esque moment on the stump. Rubio's performance was better than expected in Iowa, helping him pick up nine more Congressional endorsements to pass Bush in the race. This momentum increases the likelihood that Rubio's Republican rivals will target him heavily in their attempts to woo New Hampshire's voters. On the other side of the aisle, Bernie Sanders' surprisingly strong performance in Iowa demonstrates his wide appeal, and the polls show that the Senator will win next week's primary with a 17.6 lead; however, Clinton still has a confident hold on the national primary polls. The Sanders campaign actually raised more money than Clinton last month, pulling in more than \$20 million versus Clinton's \$15 million. Both Romney and Obama won the New Hampshire primary in 2012, so the importance of these early primaries shouldn't be understated; however, there is still a long way to go until November and the results of Super Tuesday (March 1st) might be more telling.

## Rebound in Auto Demand Will Boost Total Retail Sales to Start 2016

The economic calendar is light leading up to **January's retail sales report (Friday)**, which is expected to show a modest improvement after failing to live up to the usual holiday surge at the end of 2015. Both headline and core retail sales declined 0.1% in December, a big disappointment given the fact that U.S. growth is relying heavily on domestic consumption to carry it through the coming months. Sales continue to be dragged down by falling gas prices, as real retail sales were actually unchanged for the month. Furthermore, figures were held back by a brief slowdown in auto demand at the end of the year. Fortunately, unit auto sales rebounded in January and should help lift real retail sales for the month, even if the nominal figures remain subdued.

## Fun Fact

For the Super Bowl, the two teams are supplied with a total of 216 footballs (54 each for both practice and game day), requiring a total of 22 cowhides to produce. (Wilson Football, February 2016)
