

## Market Comment

# Risk-off mood abated by the trade relief after the G20 summit

- Risk-off mood abated after the talks on the sidelines of the G20 summit held this weekend in Osaka. Trump-Xi manage to get talks back on track, Russia and Saudi Arabia agreed to extend crude oil output cuts and EU and Mercosur (Argentina, Brazil, Paraguay and Uruguay) reached a trade deal after two decades of negotiation.
- U.S. and China agreed to resume trade talks with a temporary truce, renewing optimism about the likelihood of a trade deal. In this context, US delayed further tariffs on Chinese goods, but would not lift existing import tariffs. Moreover, Huawei got lighter restrictions on component suppliers from the U.S. whose officials will meet in the next few days to decide whether to take it off the blacklist, whereas China agreed to boost US farm purchases, especially soybean.
- The EU and Mercosur reached a trade deal which will remove the majority of tariffs on EU exports to Mercosur and Mercosur exports to the EU. Consequently, it will make EU companies more competitive by saving them €4bn worth of duties per year and it will support Mercosur to boost exports of farm commodities. Besides that, European leaders after a long meeting in Brussels failed to reach agreement and will reconvene on Tuesday to agree on top jobs.
- On the data front, both official and Caixin manufacturing PMI fell more than expected into the contraction territory in June (official: 49.4, consensus 49.5, previous month 49.4; Caixin: 49.4, 50.1 consensus, previous month 50.2). In the Eurozone, its final Markit manufacturing PMI for June was downwardly revised by 0.2p to 47.6 from 47.7 in May, dragged by ongoing falls in output and new orders. In contrast, the U.S. economic activity in the manufacturing sector remained in the expansion level in June above consensus estimates, although at a slower pace than in May (51.7, consensus 51, previous month 52.1).
- Across fixed income securities, sovereign bond yields oscillated, trimming its early increase after ECB's dovish comments. The 10Y German bund yield slipped to its minimum level, hovering around -0.36. Meanwhile, peripheral bond yields also declined driven by search for yield strategies in bond markets. In particular, both Greece and Italy's risk premia fell sharply, the latter one led by the EC decision of delaying its decision on Italy's debt due to the summit of EU leaders.
- In FX markets, the USD appreciated against the G10 currencies as the trade truce has slightly lowered the markets expectations of two Fed rate cuts at the end of this month. Moreover, the JPY and gold prices declined amid increased risk appetite against the backdrop of an increasing hope for a trade deal between the U.S. and China. In emerging markets, the TRY appreciated significantly after Trump eased his threat to sanction the Turkey's purchase of Russian missile while the CNY hit two months high against USD encouraged by the G-20. Elsewhere, ARS and BRL also appreciated supported by the EU-Mercosur trade deal.
- Early gains in crude oil, driven by the OPEC members agreement on extending production cuts until at least March 2020, eased. This decline was due to disappointing manufacturing data in the U.S., China and the Eurozone which lowered the expectations of oil demand in the future, suggesting that a more aggressive production cut may be needed. Furthermore, gold prices declined below 1400\$ per ounce as a consequence of increased risk appetite.
- Equity markets rose encouraged by the G20 trade relief with tech companies leading the gains.
