

Market Comment

Cautiousness returns amid weak manufacturing data

- A weak 10Y Japanese bond auction prompted declines in sovereign debt worldwide, but disappointing manufacturing data trimmed early losses.
- On the data front, ISM manufacturing unexpectedly fell deeper into contraction in September to a 10-year low (47.8, consensus 50, prior 49.1) with new orders, employment, exports and prices paid all remaining below 50. Moreover, U.S. construction spending grew at a slower pace than expected in August (0.1% MoM, consensus 0.5% MoM, prior 0.1% MoM). Elsewhere, European manufacturing PMIs were mixed in September. German and the Eurozone's manufacturing PMI were upwardly revised, although still in the contraction area, while PMIs of Italy and France shrunk more than expected. Moreover, inflation in the Eurozone continue to be muted as the annual inflation declined 0.1% to 0.9%, whereas the annual core CPI slightly improved in line with expectations (1.0% YoY, consensus 1.0% YoY, prior 0.9% YoY).
- The Bank of Japan announced yesterday its plan to reduce its longer-term government securities purchases with the intention to steepen the curve, which may lead to a higher demand of ETFs as it further cut bond purchases. Japan's Government Pension Investment Fund supported the BoJ's plan by categorizing currency-hedged foreign bonds as domestic debt, which should reduce its demand for Japan's longer-term debt.
- U.S. and European sovereign bonds were mixed but they all trimmed early losses after the ISM indicated that U.S. factory activity is continuing to deteriorate. The yield on the 10Y UST bond reverted drastically (declining -5bps, after increasing 7bps earlier this morning), while the yield on 2Y dropped 8 bps. In this context, market expectations of an additional Fed rate cut by the end of the year increased 10% to 83%. In Europe, 10Y Italian bonds underperformed with its risk premium widening 3 bps, whereas the rest of European sovereign bond erased early losses (10Y German bund yield +0.7 bps).
- The DXY index halted its upward trend (-0.2%) with disappointing U.S. manufacturing data, while other safe-haven currencies gained (JPY +0.3%). The pound fell 0.3% ahead of Boris Johnson's new plan for a Brexit deal to the EU. In addition, EM currencies continue to weaken (FXJPEMCS -0.3%) with the TRY (-1.3%) leading the losses as geopolitical risks increase. LatAm currencies also slipped (LACI index -0.3%), especially the Peruvian sol (USDPEN -0.6%) led by political turmoil.
- U.S. and European stock markets dropped with industrials leading the path (S&P 500 -0.5% and Euro Stoxx 50 -1.2%) as concerns over the global economic growth weighed on market risk sentiment.
