

## Market Comment

## Virus concerns ripple across markets

- A risk-off mood rippled across markets**, underpinned by mounting concerns about the coronavirus' negative spillover effects on global growth, through supply chain disruptions with companies halting production in the affected regions, and suspending travel. Investors sought shelter in bond markets, dragging equity markets and commodities. The latter had a slight spillover effect on HY bonds (spread +12bps).
- This Thursday, **the World Health Organization (WHO) declared the rapidly spreading novel coronavirus outbreak a Public Health Emergency of International Concern**. The WHO stated its confidence in China's capacity to control the outbreak, but raised great concerns over the potential for the virus to spread to countries with weaker health systems. The outbreak has caused 213 deaths in China, with nearly 10,000 cases worldwide.
- The U.S. economy is losing some steam, whereas the EZ showed disappointing growth in 4Q19**. U.S. personal income fell more than expected in December (0.2% MoM; Cons: 0.3% MoM; Prev: 0.4% revised down from 0.5%), while personal spending also weakened in line with expectations (0.3% MoM; Prev: 0.4% MoM). The January Chicago business barometer unexpectedly fell to 42.9 (Cons: 48.9; Prev: 48.2), the lowest level since December 2015. Meanwhile, EZ GDP grew by 0.1% QoQ in 4Q19, slightly below expectations (0.2%) amid weaker support from domestic demand (especially inventories) partly offset by a positive contribution of net exports. Headline inflation accelerated by 0.1pp to 1.4% YoY in Jan driven by higher energy prices while core inflation slowed by 0.1pp to 1.3% YoY driven by lower service inflation. Finally, China's January NBS PMI declined from 50.2 in the previous month to 50, while non-manufacturing NBS PMI increased to 54.1 from 53.5 in the previous month.
- Sovereign yields plunged across the board, due to the virus spillover risks**. Moreover, softer U.S. consumption in 4Q19, jointly with slightly dovish Fed, improved bond demand. The U.S. 10Y yield broke below 1.6% level, while the 10Y yield German yield hit -0.4%, reversing the improvement seen after the trade agreement. The drawdown in nominal yields was led mainly by the term premium (-8bps in the U.S. and -7bps in Germany) and real yields (-5bps in the U.S. and -3bps in Germany). Moreover, market expectations of an additional Fed interest rate cut have been brought forward to July (60% probability of 25bps interest rate cut in July), with a very high probability for a December cut (80%). Even the odds for a 50bp cut in 2020 rose to 53%. In addition, the expectations for an ECB hike this year have disappeared, while markets attach a 50% probability to a rate cut in 2020.
- The cyclical commodity sell-off that gripped markets last Friday rolled into this week**, reflecting anxieties about the impact of the virus on growth. Brent oil prices fell, while industry metal commodities such as copper slumped.
- FX markets show minor changes but moved in a risk-off mood pattern**, with the GBP outperforming this week ahead of today's Brexit resolution. The JPY and the CHF appreciated, while EM depreciated, with commodity-linked currencies bearing the brunt.
- Equity markets tumbled in Asia, while the declines were more contained in the U.S.** due to positive company earnings and expectations of a supportive Fed, if needed. In Europe and Latam, equity markets declined around 2%. Elsewhere, implied volatility increased further (VIX 18 +3 points after fluctuating during the week).
