## 2. 94.6% of remittances come from the United States, 98.5% are sent by electronic transfer and 74.9% are paid in non-banks

The United States is the main country of origin of remittances to Mexico, having transferred 34,110 million dollars to Mexico in 2019, which accounts for 94.6% of the total. This is because a large part of the Mexican diaspora, both migrants and descendants, reside in our northern neighbor. California alone sent 10,530 million dollars in remittances to Mexico in 2019, in second place is Texas with 5,560 million dollars, followed by the states of Illinois, Florida, New York and Georgia, with amounts of between 1,200 and 1,500 million dollars each.

Almost all remittances received in the Mexican Republic in 2019 were sent by electronic transfer (98.5%), only 377 million dollars (1.0%) were sent in cash or in kind and 164 million dollars (0.5%) by money orders. In Mexico, 74.9% of remittances were collected at non-banking institutions and 25.1% at banks.
