Home prices continue to decline while housing activity gains some ground

Housing activity indicators for 4Q11 continued to be better-than-expected while home prices keep falling. Pending home sales, a forward-looking indicator for existing home sales, increased 7.3% in November to 5.9%, above its November 2010 level. However, home prices continued to decline in October, according to S&P Case-Shiller home price index. The 20-cities home price index, which is a 3-month moving average, declined 0.6% MoM or 3.4% YoY. Home prices fell in 19 of the 20 cities included in the index. The report indicates that current home prices are at levels around its March 2003 levels and recent improvement in housing activity could be the result of declines in home prices not better fundamentals.

U.S. labor market also shows slight improvement in the last couple of months. Although the total nonfarm payrolls did not increase significantly, the unemployment rate declined faster than expected mainly due to decline in the participation rate. According to BLS, in the week ending December 24, initial claims increased 15K to 381K from the previous week's revised figure of 366K, on a seasonally adjusted basis. However, the 4-week moving average dropped 5.75K to 375K indicating slow improvement in the labor market conditions.

Along with stronger economic activity in 4Q11 and improvement in labor market conditions, U.S. consumers expect better economic prospects in the next six months. The Consumer Confidence Index, increased more than the market expectation of 56.0 to 64.5. Increase in consumer confidence suggests that personal consumption expenditures in December would be similar to the previous two months and provides additional evidence of stronger growth in 4Q11. We expect that the U.S. economy grew more than 3.0% QoQ annualized in 4Q11.

Week Ahead

ISM Index (December, Tuesday 10:00 ET)

Forecast: 53.7	Consensus: 53.2	Previous: 52.7
----------------	-----------------	----------------

The ISM Manufacturing Index increased by 1.9pp to 52.7 in November, suggesting modest economic expansion in manufacturing activity. The prices sub-index remained below the threshold of 50, indicating no price pressures in the industry. On the other hand, new orders index has risen in the previous two months and is currently at 56.7 which points to a moderate increase in production. Moreover, the employment index has been above 50 since September 2009 although it declined in November. We expect the ISM and Employment indices to climb in December, consistent with our expectation of stronger economic growth in 4Q11 than in the previous quarter.

FOMC Minutes (Dec-13, Tuesday 14:00 ET)

Forecast: ---	Consensus: ---	Previous: ---
---------------	----------------	---------------

In its last meeting, the Fed kept the target interest rate steady at 0.0% to 0.25% and maintained its existing policy of lengthening the average maturity of its system open market account portfolio. The Fed also continued its policy of reinvesting principal into mortgage based securities. Although the statement revealed no new communication strategies or new information regarding the future of monetary policy stance, Minutes might hint us what the FOMC members consider for future monetary policy moves.

Factory Orders (November, Wednesday 10:00 ET)

Forecast: 2.1%	Consensus: 2.0%	Previous: -0.4%
----------------	-----------------	-----------------

Although factory orders declined slightly in October, second straight month, we expect factory orders to jump 2.1% in November, suggesting manufacturers could gain some ground despite a weak economy. Durable goods orders, which account more than 50% of the factory orders, rose 3.8% to \$207bn according to U.S. Census Bureau's advance report, which indicates strong increase in factory orders in November.

Nonfarm Payrolls (December, Friday 08:30 ET)

Forecast: 155K	Consensus: 150K	Previous: 120K
----------------	-----------------	----------------

Labor market is expected to remain weak mainly due to low employment creation in construction sector and ongoing layoffs in local and state governments. The unemployment rate dropped surprisingly in November to 8.6%, the lowest since March 2009, but largely reflects a decline of 315K in the labor force. The participation rate has been declining since the recession and near a decade-low at 64.0%, which is a discouraging sign for potential employment growth. On the other hand, the private sector created 2.5 million jobs in the last two years and we expect that this trend will continue although it will not be sufficient to decrease the unemployment rate in December.

Market Impact

Markets will continue to remain relatively quiet in the first week of the new year. Although significant increase in ISM Indices would suggest strong economic growth in 4Q11, markets' focus will be on the European markets. Any negative news from the European markets would increase volatility in the U.S. financial markets. Happy New Year!

DISCLAIMER

This document and the information, opinions, estimates and recommendations expressed herein, have been prepared by Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter called "BBVA") to provide its customers with general information regarding the date of issue of the report and are subject to changes without prior notice. BBVA is not liable for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, or to undertake or divest investments. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. The contents of this document is based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. BBVA accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of initial investment and, in such circumstances, investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

BBVA or any of its affiliates, as well as their respective executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in this document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of this report, to the extent permitted by the applicable law.

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. No part of this document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted, without the prior written consent of BBVA. No part of this report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

In the United Kingdom, this document is directed only at persons who (i) have professional experience in matters relating to investments falling within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (as amended, the "financial promotion order"), (ii) are persons falling within article 49(2) (a) to (d) ("high net worth companies, unincorporated associations, etc.") Of the financial promotion order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the financial services and markets act 2000) may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons. The remuneration system concerning the analyst/s author/s of this report is based on multiple criteria, including the revenues obtained by BBVA and, indirectly, the results of BBVA Group in the fiscal year, which, in turn, include the results generated by the investment banking business; nevertheless, they do not receive any remuneration based on revenues from any specific transaction in investment banking.

BBVA is not a member of the FINRA and is not subject to the rules of disclosure affecting such members.
