

Daily Flash

Asia

A pair of positive retail sales outturns today in Australia and Hong Kong underscored the robustness of the region's domestic demand and resilience to the weakening global environment (see below). However, equity markets mostly moved lower (Hang Seng: -0.7%, Shanghai: -0.6%) after the Fed's decision to stay on hold yesterday, and before the ECB decides on monetary policy today.

Australia's consumer spending shows resilience...

Australia's retail sales rose by 1% m/m in June (consensus: 0.7% m/m), the biggest increase since April 2011. The pickup in consumer spending is attributed to government subsidies such as carbon rebates and benefit checks, as well as the strong Aussie dollar. The upbeat retail data lifted sentiment regarding the domestic sector, providing a needed boost for the economy as Australia's exports continue to be weighed down by global headwinds. We think in light of the resilience in the economy, the RBA is likely to keep its policy rate unchanged at 3.50% in its monthly policy meeting on August 7th. On the trade front, Australia's posted a better-than-expected trade balance in June, with a surplus of AUD 9 million (Market consensus: a deficit of AUD 375 million), as imports declined 2% m/m in the month, thanks to falling oil prices.

...and Hong Kong also posts better-than-expected retail sales

Hong Kong's retail sales grew by 11.0% y/y in June (consensus: 9.1% y/y), up from a disappointing 8.7% y/y outturn in May. The better-than-expected outturn was mainly attributed to resilient domestic consumption – note that unemployment is remaining low (3.2%) despite a significant slowdown in exports, thereby supporting spending – and strong inbound tourism spending. However, negative spillover effects from the external environment may eventually dampen consumer sentiment, and therefore need to be watched closely in the coming months.

Briefly noted:

• Yesterday, India reported that PMI moderated to an eight month low in July (52.9), driven by a broad based decline in new orders, production, and employment. Despite the significant deterioration in India's growth momentum, further monetary easing by the Reserve Bank of India will likely remain on hold for the time being given still-high inflation, though we expect 50bps in cuts by the end of this year.
