Private-sector credit continues double-digit growth

Credit granted by commercial banks to the private sector continued to expand in June 2012. In the first half of 2012, its average nominal growth rate was 15.3%, up on the figure of 11.6% for the same period in 2011. Also, in June 2012, the nominal annual growth rate for total credit was 16.1%. This rate was higher than for the preceding month (16%) and for the same month in 2011 (12.8%). Nominal growth rates in the three main lending categories (consumer finance, residential mortgages and corporate) were also all in double figures.

- **Consumer finance: growth in June once more at a nominal annual 23%**

In June 2012, the nominal annual growth rate of consumer finance was 23.1%, just under the previous month's rate (23.3%) and higher than that for the same month in 2011 (16.7%). The nominal annual growth rates for the three components of consumer finance in June were: other consumer finance, which includes payroll loans, 38.1%; credit cards, 15.7%; and loans for the purchase of consumer durables, 6.2%. Growth in the consumer lending category of other consumer finance picked up growth in the last quarter of 2010 and closed December 2011 at 47.5%. From then, there has been a slight slowdown in the rate of growth this category of consumer finance.

- **Corporate lending: favorable performance, with growth of nearly 15%**

In June the nominal annual rate of growth for corporate lending was 14.9%. This rate was slightly lower than the preceding month (15%) but higher than the same month in 2011 (11.9%). It is worth noting that the nominal annual average growth in corporate lending in the first half of 2012 was 12.8%, while the figure for the same period in 2011 was lower, at 12.3%. This indicates the possibility that corporate could perform worse in 2012 than last year.

- **Housing: 10.7% average growth rate in the first half of 2012**

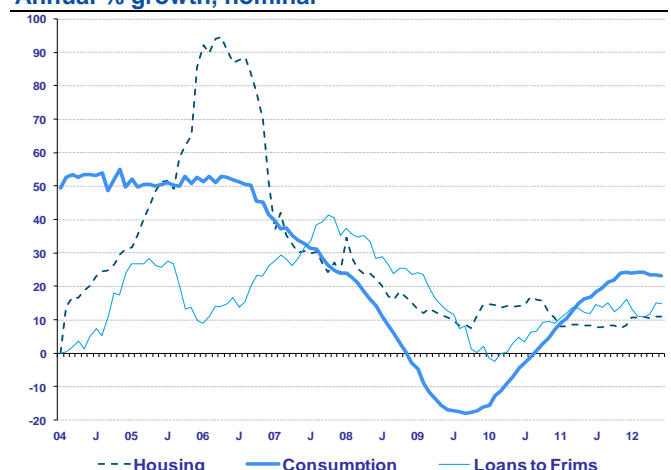

In June 2012, nominal annual growth in mortgage lending was 11%. This was slightly higher than in the preceding month (10.9%) and also higher than the same month in 2011 (8.2%). It is worth noting that the growth rate in June 2012 is slightly up on the average growth rate for this type of lending to households in the first half of 2012 overall, which was 10.7%. In the same period in 2011 the average nominal annual rate was lower, at 8.2%. This indicates a better performance of this form of credit so far in 2012.
