## Asia

*The rally in Asian equities continued today with almost all stock markets rising, notably in India (Sensex: +1.1%), sustained by the positive market trends in Europe and the US. In currency markets, the recent rise in the Australian dollar has been notable, and it continued to appreciate today (+0.1% to 1.06 AUD/USD) after the RBA's decision to hold interest rates (see below), finishing at its highest level versus the US dollar since mid-March. Meanwhile, news regarding the real economy is less upbeat, as evidenced by a disappointing July exports outturn in Taiwan (see below).*

### Australia keeps policy rate unchanged on resilient domestic economy

The Reserve bank of Australia left its policy rate unchanged today at 3.50%, as expected, at its monthly policy meeting. The central bank stated that most indicators suggest growth is currently close to trend, and labor market data suggests moderate employment growth despite the challenging external environment. The RBA has already cut the policy rate twice this year, in May and June, by a total of 75 bps to counter global headwinds. The domestic economy has shown signs of resilience in both consumer spending and the housing market - that said, global uncertainties still pose a risk to the economy. We maintain our view that the RBA will announce one more rate cut of 25 bps by the end of this year given low inflation and external headwinds.

### Taiwan's July exports fall by more than expected

Taiwan's exports contracted by -11.6% y/y in July (consensus: -7.7% y/y), compared to -3.2% in June, the fifth consecutive month of decline. The weak outturn was again driven by information and communications products (-34.5% y/y). By country, demand fell most sharply to the US and Europe. Meanwhile, imports were slightly better than expected (-3.2% y/y vs. consensus -7.0% y/y). The outturn is a further sign that Taiwan's growth momentum has stalled (second quarter GDP growth was -0.2%, below expectations), as Taiwan finds its exports stuck in a similar malaise as other open economies in the region, like Korea and Hong Kong. As a result, Taiwan's government plans to boost exports by launching more supportive policies in the H2 2012 (which would include measures to stimulate emerging market demand for exports, as well as improving overseas trade offices), but in the short term growth momentum is likely to remain subdued.

## Indicator of the Week

### China: Industrial output for July (August 9)

Forecast: 9.9% y/y

Consensus: 9.7% y/y

Prior: 9.5% y/y

With the government tuning up its stimulus measures to counter the economic slowdown, July industrial production will be watched for further signs of stabilization in the growth outlook. Manufacturing PMI released for July presented a mixed picture, showing a weak outlook for large enterprises but strengthening for SMEs. In line with our expectations of a gradual rebound in growth during the second half of the year, we expect industrial production to pick up slightly from the previous month, as the authorities' recent policy measures boost domestic demand. Similarly, we expect other indicators to be released during the coming week, including credit growth, to show similar trends. Markets will also be watching for data in the coming week on July inflation, retail sales, and investment.

## Calendar Events

### Australia - RBA Cash Target, August 7

We expected the benchmark rate to remain unchanged

Current	Consensus	New
3.50%	3.50%	3.50%
