Moody's upgrades Korea's sovereign rating on sound fundamentals

Moody's upgraded Korea's sovereign rating to Aa3 from A1 today, a move which places Korea at the same ratings threshold as China and Japan. In its statement, Moody's praised Korea's resilience to external shocks and noted that "the large size of Korea's domestic capital market, low inflation, low risk premium on government securities, and a relatively favorable long-term outlook for economic growth mean that fundamental pressures on the government's debt-carrying capacity are notably absent." The report also cited a recent decrease in tensions with North Korea. It did not, however, mention the increase in tensions with Japan over territorial disputes in the East Sea, which risk spilling over into economics relations (as seen by statements from a Korean trade negotiator that negotiations free trade negotiations with Japan would be 'difficult' given the ongoing dispute). While today's decision by Moody's is welcome and highlights Korea's strong medium-term outlook, our forecast for Korea's GDP this year currently calls for growth to slow to 2.5% y/y, from 3.6% last year, due to the weak external environment. The won, which had been down -0.3% on the day, rallied after Moody's announcement before ending the day down -0.1% at 1,135/USD.

Premier Wen Jiabao addresses China's slowdown, hints at policy support

Several media outlets today picked up on Premier Wen Jiabao's statements over the weekend, and detected a sense of urgency by the leadership in seeking to stabilize the economy's slowing growth momentum. In a visit to export-oriented Guangdong province in the south of China during August 24-25, Premier Wen reportedly acknowledged that China's exports continue to face difficulties. Nonetheless, he emphasized that the full-year target of export growth remained achievable with extra measures to support producers. Markets were down sharply in China today, with the Shanghai Index closing down by -1.7%.

Briefly noted:

- **Vietnam's export growth in August slowed to 6.0% y/y** from 9.3% y/y in July. Vietnam's trade balance swung to a USD 150 mn deficit, after two months of surpluses, on relatively strong import growth.

Indicator of the Week

India: Q2 GDP Growth 2012 (August 31st)

Forecast: 5.1% y/y	Consensus: 5.3% y/y	Prior: 5.3% y/y
--------------------	---------------------	-----------------

India's economy continues to be plagued by slowing growth and elevated inflation. The outturn for Q2 GDP growth will be a key input for the Reserve Bank of India's next monetary policy decision in September, and another weak outturn, dragged down by waning fiscal support and slowing industrial and services activity, could raise the likelihood of an imminent interest rate cut, in line with our expectations of an additional 50bps in cuts by end-year.

Wholesale price inflation (6.9% in July), however, remains a constraint, exacerbated by a sub-par monsoon and supply bottlenecks. Overall, we expect India's GDP growth to decline to 5.6% for full year 2012, down from 7.5% in 2011.
