

Daily Flash

Asia

Asian stock markets were up today, led by gains in Japan with the Nikkei up by more than 2%, and closing above the 10.000 level for the first time since April. The Nikkei is now up by over 17% since its most recent low in mid-November, as the Yen's recent weakness boosts the outlook for exporters in the wake of last Sunday's election of incoming Prime Minister Shinzo Abe, who continues to pressure the Bank of Japan for more monetary easing. Meanwhile, Koreans are awaiting the results of today's Presidential election, with polls indicating a close race between the conservative Park Geun-hye and liberal Moon Jae-in.

India's policy reforms gain traction with banking and corporate amendments

India's new-found policy reform momentum continues to build as the government successfully cleared two bills - one related to banking, and the other for corporations. The newly amended corporate bill will improve governance and reduce red tape, while the banking bill will allow the RBI to issue bank licenses to eligible private Indian corporations, enhance regulatory powers of the RBI, raise voting rights for investors in banks, and allow state-owned banks to raise capital through rights issues. Passage of the new banking amendment bill opens the door for final guidelines by the RBI on issuance of new banking licenses for foreign banks, expected to be released in 1013.

Japan's trade deficit widens, as pressure mounts on the Bank of Japan

Japan's November trade deficit was -953.4bn yen (prior: -549.0bn yen, consensus: -1035.1bn yen) the fifth consecutive month of deficit. Exports contracted in November by -4.1% y/y (Prior: -6.5%, Consensus: -5.5%), as exports to China slumped by -14.5% y/y. Incoming Prime Minister Shinzo Abe is pressing the Bank of Japan to raise its 1% inflation target to a 2% target, adding pressure on the BOJ to increase its asset-purchase program during its monetary policy meeting, which concludes tomorrow.

Briefly noted:

- Malaysia's inflation remained moderate at 1.3% y/y in November (consensus: 1.4%).
 Despite relatively strong economic growth, inflationary pressures have been mitigated by productivity gains and capacity expansion. Subdued inflation should allow monetary policy to remain accommodative (the central bank has kept the interest rate steady at 3% for 9 straight meetings). The next MPC meeting will take place on Jan 30-31, 2013, where we expect no change in rates.
- Taiwan's central bank stayed on hold in its quarterly monetary policy meeting today, leaving rates at 1.875% for the fifth straight meeting, as expected. With the bottoming-out in China and a slightly better global environment, we expect Taiwan's central bank to leave interest rates unchanged in the coming quarters.

Indicator of the Week

Taiwan: Export orders for November (December 20)

Forecast: 2.4% y/y Consensus: 3.9% y/y Prior: 3.2% y/y

Taiwan's export orders are closely watched as a leading indicator of regional export trends given the economy's position in the global supply chain. Export orders' upbeat reading in October reflected solid demand from the US and Europe, mainly due to the year-end holiday season. We expect such impact to moderate in the following month. On the other hand, China's recent activity indicators point to a rebound in the fourth quarter, which will partially support the orders performance. The risks from weak global demand remain, and the pace of recovery is expected to be mild and gradual. We also expect the central bank of Taiwan to keep the benchmark rate on hold during the upcoming policy meeting, given the abundant liquidity in the economy and improved growth outlook.
