

Market Comment | Global markets react negatively to FOMC's dovish message

Global Financial Markets Unit
18 Sep 2015

- **US leading indicator** rose less than expected in August (by 0.1% MoM; consensus: 0.2%)
- **Dovish Views Dominate as FOMC Holds Back on Rate Hike.** The statement noted that “recent global economic and financial developments may restrain economic activity somewhat and are likely to put further downward pressure on inflation in the near term.” Clearly, the latest spillover from China’s market crumble has spooked some among the Committee. In addition, FOMC members stressed the risk to inflation from lower import prices, considering the appreciation of the USD and the possibility that higher rates could intensify the dollar’s strength. The dovish undertones were also evident in the updated Summary of Economic Projections, One of the biggest adjustments since June was a shift in the FOMC participants’ assessments of the appropriate timing for monetary policy. Median projections have declined since June, especially with only two meetings left for a hike in 2015. In the long-run, the median expected rate dropped from 3.63% in June to 3.5% in September, suggesting an even more gradual pace of rate hikes (one less 25bp increase) compared to the previous meeting. The Fed’s decision to delay the first rate hike has shifted our expectations to December. We expect that they will wait until December to gather as much information as possible. ([see](#))
- **Global markets react negatively to FOMC’s dovish message.** This week’s movement have been highly conditioned by uncertainty about the Fed’s decision. During the week, volatility remained at relatively low levels across the board until the US monetary authority announced no changes in the Fed Funds rate. The Fed’s arguments for not raising rates - mainly the negative global outlook and downward revision of inflation rate- were not well-received by markets. The deterioration of the global outlook on the back of the Fed’s pessimism undermined global bond yields especially US yields, which reacted falling close to 10 bps in all tenors, after the Fed’s announcement, ending the week broadly unchanged (2Y:-3bp, 10Y: -4bp). However, European yields fell sharply today on the back of the Fed’s doubts about the global economic outlook (GER 10Y:-12bp to 0.66%, FRA 10Y: -14bp, ITA 10Y: -14bp, SPA 10Y: -15bp to 1.95%, POR 10Y: -15bp, GRE 10Y: -25bp). During the week, European safe-haven yields remained flat, while peripheral yields dropped sharply and risk premia narrowed as a result (ITA 10Y: -7bp, SPA 10Y: -16bp, POR 10Y: -9bp). The drop in the yield on Greek sovereign bonds during the week (GRE 10Y: -53bp) indicates slight optimism about the outcome of the General Elections to be held on Sunday. US equity markets dropped after FOMC statement, offsetting the gains earlier this week. Moreover, European equity markets fell in the week (Eurostoxx: -1.0%, CAC: -0.7%, DAX: -2.1% MIB: -0.9%), mainly reflecting today’s drop, led by the cyclical sectors. The IBEX-35 is the only exception among the main European indices, rising 1.1%, helped by yesterday’s rebound of medium-sized (domestic) banks. Asian markets dropped (Nikkei:-1.1% Shanghai: -3.2%) due to the ongoing worries concerning the economic outlook for China. The reaction in FX markets was significant, with the USD depreciating against both major currencies (EUR: +0.56% GBP: +1.22%) and EM currencies (RUB: +2.8% MXN: +1.9% COP: +1.8% CLP: +2.0% TRY: +1.7%). The commodities markets also reflected the

high cyclical risk premium, with safe-haven commodities such as precious metals surging after the FOMC decision (gold +3.0%), while industrial metals declined (copper -2.5%) while oil prices were mixed, with the WTx recovering in the week (+1.3%) while Brent remained flat.

Update 16.00 CET 18 September, 2015

DISCLAIMER

This document and the information, opinions, estimates and recommendations expressed herein, have been prepared by Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter called "BBVA") to provide its customers with general information regarding the date of issue of the report and are subject to changes without prior notice. BBVA is not liable for giving notice of such changes or for updating the contents hereof.

This document and its contents do not constitute an offer, invitation or solicitation to purchase or subscribe to any securities or other instruments, or to undertake or divest investments. Neither shall this document nor its contents form the basis of any contract, commitment or decision of any kind.

Investors who have access to this document should be aware that the securities, instruments or investments to which it refers may not be appropriate for them due to their specific investment goals, financial positions or risk profiles, as these have not been taken into account to prepare this report. Therefore, investors should make their own investment decisions considering the said circumstances and obtaining such specialized advice as may be necessary. The contents of this document are based upon information available to the public that has been obtained from sources considered to be reliable. However, such information has not been independently verified by BBVA and therefore no warranty, either express or implicit, is given regarding its accuracy, integrity or correctness. BBVA accepts no liability of any type for any direct or indirect losses arising from the use of the document or its contents. Investors should note that the past performance of securities or instruments or the historical results of investments do not guarantee future performance.

The market prices of securities or instruments or the results of investments could fluctuate against the interests of investors. Investors should be aware that they could even face a loss of their investment. Transactions in futures, options and securities or high-yield securities can involve high risks and are not appropriate for every investor. Indeed, in the case of some investments, the potential losses may exceed the amount of investment and, in such circumstances; investors may be required to pay more money to support those losses. Thus, before undertaking any transaction with these instruments, investors should be aware of their operation, as well as the rights, liabilities and risks implied by the same and the underlying stocks. Investors should also be aware that secondary markets for the said instruments may be limited or even not exist.

BBVA or any of its affiliates, as well as their respective executives and employees, may have a position in any of the securities or instruments referred to, directly or indirectly, in this document, or in any other related thereto; they may trade for their own account or for third-party account in those securities, provide consulting or other services to the issuer of the aforementioned securities or instruments or to companies related thereto or to their shareholders, executives or employees, or may have interests or perform transactions in those securities or instruments or related investments before or after the publication of this report, to the extent permitted by the applicable law.

BBVA or any of its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to its clients that reflect opinions that are contrary to the opinions expressed herein. Furthermore, BBVA or any of its affiliates' proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. No part of this document may be (i) copied, photocopied or duplicated by any other form or means (ii) redistributed or (iii) quoted, without the prior written consent of BBVA. No part of this report may be copied, conveyed, distributed or furnished to any person or entity in any country (or persons or entities in the same) in which its distribution is prohibited by law. Failure to comply with these restrictions may breach the laws of the relevant jurisdiction.

In the United Kingdom, this document is directed only at persons who (i) have professional experience in matters relating to investments falling within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (as amended, the "financial promotion order"), (ii) are persons falling within article 49(2) (a) to (d) ("high net worth companies, unincorporated associations, etc.") Of the financial promotion order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the financial services and markets act 2000) may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons. The remuneration system concerning the analyst/s author/s of this report is based on multiple criteria, including the revenues obtained by BBVA and, indirectly, the results of BBVA Group in the fiscal year, which, in turn, include the results generated by the investment banking business; nevertheless, they do not receive any remuneration based on revenues from any specific transaction in investment banking.

BBVA is not a member of the FINRA and is not subject to the rules of disclosure affecting such members.

"BBVA is subject to the BBVA Group Code of Conduct for Security Market Operations which, among other regulations, includes rules to prevent and avoid conflicts of interests with the ratings given, including information barriers. The BBVA Group Code of Conduct for Security Market Operations is available for reference at the following web site: www.bbva.com / Corporate Governance".

BBVA is a bank supervised by the Bank of Spain and by Spain's Stock Exchange Commission (CNMV), registered with the Bank of Spain with number 0182.
